

*Science at Naenae College.*

We have done so many things in science this year including metals electricity and the human body and many other experiments. I have the pleasure of going to science at the college three times a week I have a very wonderful teacher Mr Conroy and some very helpful classmates I look forward to going to science in the future.

Thank you  
Blake

Aitken and Jacinta went to a Kiwi Chat gathering last week. The idea of this event is for students who use alternative forms of communication to get together and chat to each other. Aitken and Jacinta had a great time playing "Fear Factor" with spiders, bugs, mud and slugs!

## word of the week

make/hanga

to make  
to do

Form right fist Move  
formation in small circles  
over left fist hitting twice

Totara Class made damper on a camp fire last week. It was such a great sensory experience and it looked like so much fun that some of the other Evans Bay students just had to join in. The damper tasted delicious as well!
